PROFESSIONAL SUMMARY

Construction HSE Professional with 8+ years of experience delivering HSE leadership across complex industrial construction projects, including refinery brownfield EPC, offshore platform fabrication, marine operations, and nickel smelter developments. Experienced in supporting US\$7 billion mega projects involving 26,000+ personnel and 30+ contractors within brownfield and live operating environments. Proven expertise in contractor HSE management, incident investigation, PTW, SIMOPS, and risk management. Contributed to over 100 million safe man-hours and experienced across construction, pre-commissioning, commissioning, and start-up of major industrial facilities.

Certified in NEBOSH IGC, Accident Investigation, ISO 45001 Internal Auditor, STCW95, and H2S Authorized Gas Tester.

KEY HIGHLIGHTS

- 8+ years of HSE experience across EPC, civil and industrial construction project, refinery brownfield, offshore platform fabrication, marine operations, and nickel smelter construction.
- Supported HSE delivery on mega industrial projects for a US\$7 billion refinery EPC project involving 26,000+ personnel and 30+ contractors, contributing to over 100 million safe man hours.
- Led teams of up to 20 HSE professionals, overseeing field safety, permit coordination, audits, and contractor compliance.
- Specialized in high risk construction activities, including SIMOPS, heavy lifting, confined space entry, LOTO, hot work, and lifting operations
- Proven expertise in incident investigation, contractor HSE management, HIRADC, PTW systems, and stakeholder engagement.
- Experienced across construction, pre-commissioning, commissioning, and start-up while strengthening safety culture in complex industrial projects..

CORE COMPETENCIES

Construction HSE Management, EPC Projects, Brownfield & Greenfield Construction, Live Plant Operations, Industrial Construction, Multi Contractor Management, Contractor HSE Management, Permit to Work (PTW), SIMOPS, Lock Out Tag Out (LOTO), Confined Space Entry, Hot Work, Working at Height, Critical Lifting & Rigging, Excavation Safety, Electrical Safety, Energy Isolation, Risk Assessment (HIRADC), Job Safety Analysis (JSA), HAZID, Incident Investigation, Root Cause Analysis (RCA), Bowtie Analysis, Safety Leadership, Safety Culture Improvement, Behaviour Based Safety (BBS), Stakeholder Management, HSE Auditing, ISO 45001 Management Systems, Emergency Response, HSE KPI Management, Regulatory Compliance.

PROFESSIONAL EXPERIENCE

HSE Supervisor (Karunia Permai Sentosa) (November 2025 – present)

Nickel Smelter & Industrial Construction Project – Maluku, Indonesia

- Lead a team of 15 HSE Field Officers supporting mixed industrial construction activities across nickel smelter facilities, structural steel, mechanical, electrical, civil works, and supporting infrastructure within a high-risk SIMOPS environment.
- Manage and review safety controls for high-risk activities through PTW, HIRADC, JSA, LOTO, and SIMOPS across multiple contractors, audits and safety walks identifying hazards.
- Lead weekly HSE coordination meetings, management walkthroughs, and contractor safety performance reviews to drive compliance and continuous improvement and HSE KPI reporting.
- Lead incident investigations, Root Cause Analysis (RCA), contractor HSE performance reviews, and corrective action implementation, contributing to continuous safety culture improvement across the project and ensuring corrective actions are closed out

HSE Engineer (RDMP JO Balikpapan) (May 2022 – September 2025)

Refinery EPC Mega Project (Brownfield / Live Plant) – Balikpapan, Indonesia

- Supported HSE delivery for a US\$7 billion refinery EPC project involving 26,000+ personnel and 30+ contractors within a 24/7 brownfield environment.
- Coordinated SIMOPS, PTW, HIRADC, and LOTO across heavy lifting, excavation, structural, mechanical, electrical, and live plant activities. Review Job Safety Analysis to ensure safe work.
- Led 20 HSE Officers, reported and presented HSE performance, project KPIs, incident trends, and corrective actions to senior management, client representatives, and contractor leadership.
- Managed ISO 45001 audits, NCR/CAPA, and contractor HSE governance across multiple EPC contractors.
- Supported pre-commissioning, commissioning, PSSR, and start-up activities by ensuring PTW, SIMOPS, isolation integrity, and contractor HSE compliance during system handover.

HSE Supervisor (RDMP JO Balikpapan) (March 2021 – May 2022)

Refinery EPC Mega Project (Brownfield / Live Plant) – Balikpapan, Indonesia

- Supervised HSE for high-risk construction activities including heavy lifting, structural erection, deep excavation, civil work and live plant operations.
- Strengthened contractor HSE compliance through field leadership, safety coaching, workplace inspections, and proactive hazard identification.

HSE Officer (Meitech Eka Bintan) (July 2020 – February 2021)

Petronas Offshore Platform Fabrication (EPC) – Bintan, Indonesia

- Provided HSE oversight for offshore platform fabrication, including structural, welding, Electrical Instrument, heavy lifting, and fabrication yard activities.
- Coordinated marine interface, load-out, sail-away readiness, LOTO, exclusion zone management, and heavy lifting operations to ensure safe offshore platform delivery.

HSE Officer (Innovative Communication Development Indonesia) (August 2018 – March 2020)

Marine Vessel Operations – Samarinda, Indonesia

- Managed HSE for marine vessel operations aboard tugboats and barges, covering working at height, confined space entry, over-water work, vessel access, and emergency preparedness in a dynamic marine environment.

Electrical Engineer (Gunanusa Utama Fabricators) (February 2017 – February 2018)

PTTEP Offshore Platform Fabrication – Jakarta, Indonesia

- Supported electrical installation, work sequencing, LOTO implementation, and isolation management for offshore platform fabrication activities.

PROFESSIONAL CERTIFICATIONS

- NEBOSH International General Certificate (IGC) – 2022
- Accident Investigation – Oregon OSHA (USA) – 2023
- ISO 45001:2018 Internal Auditor – Singapore Safety Training Centre – 2024
- Authorized Gas Tester / H2S – BNSP Indonesia – 2024
- Basic Sea Survival & Offshore Emergency Procedures (STCW95 / IMO) – 2024
- Basic First Aid - Singapore Safety Training Centre – 2024
- Ahli K3 Umum – Ministry of Manpower, Indonesia – 2018
- OPITO BOSIET – In Progress

EDUCATION

Bachelor Degree – Electrical Engineering

Electronic Engineering Polytechnic Institute of Surabaya (PENS) – ITS Surabaya, Indonesia | Graduated 2016, GPA 3.12
